### Greetings!

Thank you for your continued interest in receiving our newsletters. Here at DMT Instruments we strive to bring you the latest news on important flow control issues, products and features. Please click on the links below for a very informative article recently published by Flow Control Magazine and the latest information regarding Environmental Reporting.

## Flow Control Magazine Discusses Key Trends in Emissions Monitoring & Control with Brad Lesko

In the January issue of *Flow Control*, Brad Lesko, president and CEO of Fox Thermal Instruments, fields questions on emissions monitoring and control applications. From regulatory initiatives in the U.S. and worldwide, to the role of thermal mass flowmeters, Lesko discusses how technology is helping industry reduce its carbon footprint.

## Environmental Monitoring Application Guide

Aimed at U.S. companies that release more than 25,000 metric tons per year of CO<sub>2</sub>-equivalent (CO<sub>2</sub>e) emissions, the new U.S. EPA mandate 40 CFR part 98, requires owners or operators of facilities that emit Greenhouse Gases (GHGs) to monitor and report annual mass emissions.

FOX thermal mass flow meters' accuracy specification exceeds the requirements defined by the EPA rule, and helps provide a reliable, cost-effective solution to environmental emissions

monitoring challenges.

## FM/FMc Approved Model FT2 Flow and Temperature Transmitter

Suitable for the harshest industrial environments, the Fox Model FT2 Flowmeter and Temperature Transmitter is FM and FMc approved for Class I, II, III, Division 2, Groups A, B, C, D, E, F, G, T4A hazardous locations, NEMA 4X and CE approved.

The FOX Model FT2 directly measures mass flow rate of air and gases, and provides isolated 4-20 mA output for process gas temperature. Available in both insertion and inline configurations.
